SKILLS

Languages: JavaScript (ES6+), Java, Ruby, SQL, HTML5, CSS3

Frontend: React, Angular, Redux, JSX, Material UI

Backend: Java (Spring + WebClient), Node.js, Express, Ruby on Rails, REST, GraphQL/Apollo

Data & Cloud: MongoDB, PostgreSQL, SQL, AWS (S3 CRT), Docker

Integrations: HubSpot (API + UI extensions), Salesforce, QuickBooks, USAePay, SchoolMint, Infinite Campus, Quire, Regrid, Pendo, Mailgun

Tools: Git, GitHub Actions, Jira, Aikido (SAST), GitHub Copilot

SUMMARY

Full-stack engineer (React + Java + Node.js) with 5+ years building SaaS integrations. At CRETElligent, owned end-to-end work connecting Radius to Salesforce, QuickBooks, HubSpot, USAePay, Quire, and Regrid. Now running a portfolio of production HubSpot integrations on contract.

EXPERIENCE

Contract

Remote

Senior Integrations Developer

April 2026 – Present

Tech: Node.js, HubSpot API, HubSpot UI extensions (React), SchoolMint, Infinite Campus, NetSuite, SFTP, systemd

- **Took over a portfolio of production HubSpot integrations** from the outgoing lead: Node.js syncs from school enrollment systems, NetSuite, and SFTP feeds. Mapped continuity risk across all ten integrations.
- **Designed cross-service sync observability:** a shared status writer in every SchoolMint sync, a new authenticated status endpoint, and a HubSpot app banner behind a serverless proxy that keeps the API key server side.
- **Gated bulk data changes behind dry runs and rollback logs:** a read-only classifier for 3,213 duplicate contacts, and a 43,700-deal backfill chunked past HubSpot's 10,000-result search cap.
- **Removed failure classes at the source:** E.164 phone normalization cleared ~6,900 rejected upserts per run; caught a copied stage mapping that would have filed every declined applicant as a won deal.

CRETElligent

Gold River, CA

Software Engineer II

June 2022 – June 2026

Tech: React, Angular, TypeScript, Java (Spring + WebClient), MongoDB, AWS (S3 CRT), Salesforce, QuickBooks, USAePay, Google Maps API

- **Shipped 100+ pull requests across five services in 18 months** spanning features, integrations, and infrastructure.
- **Designed the self-service subscription rebuild on Radius**, including sign-up with multi-step email verification, **and built its payment side** across React and Java/Spring: **USAePay payment integration** with credit-card surcharge logic, Starter monthly billing tier, and asynchronous payment flow.
- **Built the Salesforce integration layer between Radius and the CRM.** Auto-push for proposals, **vendor lifecycle API sync with Connect**, Salesforce-Quire document routing, and BulkLoad-aware sync that preserves SF-side updates.
- **Engineered the QuickBooks invoice and product-sync pipeline.** Mapped subscription titles to QuickBooks product fields and reconciled payment processing between USAePay and QuickBooks against an asynchronous order flow.
- **Led the parcel draw-tool rebuild** when Google Maps Drawing Library deprecated in June 2026. Pinned Maps JS API to v3.64, added backend alerting on Terra-init failure, **shipped across three services within four days.**

Software Engineer I

December 2020 – June 2022

Tech: React, Redux, Java (Spring), MongoDB, AWS, Material UI, Jira, GitHub

- **Designed and built Teams Management end-to-end:** React UI in order-tracker with a RadiusMap component, Java backend with TeamDao providing full CRUD, plus admin-role permissions on the teams endpoint.
- **Shipped 50+ pull requests improving the order and proposal lifecycle:** bulk-load TAT and pricing updates, duplicate-product prevention, transaction-type tracking, and MyTask table indexing.

Hi-Flier

Remote

Software Engineer

April 2020 – June 2021

Tech: React, Redux, Node, Express, Firebase, Firestore, GraphQL, Apollo, Material UI, Mailgun

- Rebuilt legacy modules, integrated new API endpoints, and implemented automated Mailgun notifications for user invitations, mission starts, and password resets.

EDUCATION

App Academy – Immersive Software Development Course (1500+ hour curriculum with < 3% Acceptance rate)

University of California, Davis – B.S. Biology (Concentration: Neurobiology, Physiology, & Behavior)
